

**Project title:** Global Project II - Strengthening and further Development of International Humanitarian Aid and the International Humanitarian System

**Duration:** 01.01.2023 – 31.12.2025 (3 years)<sup>1</sup>

**Volume:** 21 Mio. EUR

### What is the Global Project II?

The Global Project II (GP II) is a special form of cooperation between the German Red Cross (GRC) and the German Federal Foreign Office (FFO) in international humanitarian aid. It aims at reducing the negative impacts of sudden-onset disasters and (protracted and forgotten) crises on the affected population by strengthening and further developing the RCRC Movement and the wider humanitarian system to deliver high quality, effective and needs-based humanitarian aid.

GP II is complemented by the Global Project I (GP I) which focuses on the provision of high quality, context-specific implementation of humanitarian assistance through the RCRC Movement. The combination and interlinkage of the two Global Projects enables thematic developments that are oriented towards the needs of humanitarian aid projects as well as to the humanitarian system.

### Thematic areas

Building on new learnings and innovations, GP II provides support to National Red Cross Red Crescent societies as well as to humanitarian operations in three key thematic areas to contribute to the effective delivery of humanitarian aid: **Humanitarian Disaster Risk Reduction (DRR)**, **Anticipatory Action** and **Health**. Cross-cutting themes of GP II are **Humanitarian Aid in Urban Areas**, **Information Management/Digitalization** and **Climate Change**. The Project is the main funding source of the **Anticipation Hub** which has been established in 2020.

Key thematic themes for GP II		
<u>DRR</u>	<u>Anticipatory Action</u>	<u>Health</u>
<p>Disaster Risk reduction is aimed at <b>preventing new and reducing existing disaster risk</b> and <b>managing residual risk</b>, all of which contribute to strengthening resilience and therefore to the achievement of sustainable development.</p> <p>To achieve this, <b>technical support</b> is provided, while focusing on impacts of the <b>climate crisis</b>, <b>urban</b> as well as <b>fragile contexts</b> and <b>digitalization</b>. Adding to this, <b>disaster preparedness</b> is promoted, and <b>anticipatory action</b> is integrated into DRR.</p>	<p>Anticipatory action is defined as <b>acting ahead of predicted hazards</b> to prevent or reduce acute humanitarian impacts before they fully unfold.</p> <p>To achieve this, Anticipation is <b>scaled up by increasing funding; expanding geographical regions</b> covered by Anticipatory Action and <b>including complex crises</b> as well as non-weather extreme events. Moreover, there is a focus on <b>methodological development</b> as well as <b>strengthening capacities</b>, e.g., through learning.</p>	<p>Health is a sectoral topic of <b>relevance in all phases of the disaster continuum</b>, which requires effective <b>integration</b> with other thematic areas and units. <b>WASH</b> is an integral part of health interventions.</p> <p>Therefore, we contribute to the further development of <b>cash and voucher assistance methods</b> for health interventions, review approaches for <b>urban contexts</b>, strengthen the <b>use of digital tools</b>, while providing technical and operational <b>support</b>, and contributing to <b>capacity building, learning</b> and advocacy and <b>policy efforts</b>.</p>

### Main Pillars of GP II

<sup>1</sup> A first GP II Project was implemented between 2019 and 2022.  
As of 19.06.2023, DRK

### Project Support

GP II provides technical and thematic support in the key and cross-cutting thematic areas to humanitarian projects within the RCRC Movement. New methods, innovative approaches and tools are piloted and tested through this support. Learnings from the implementations are captured.

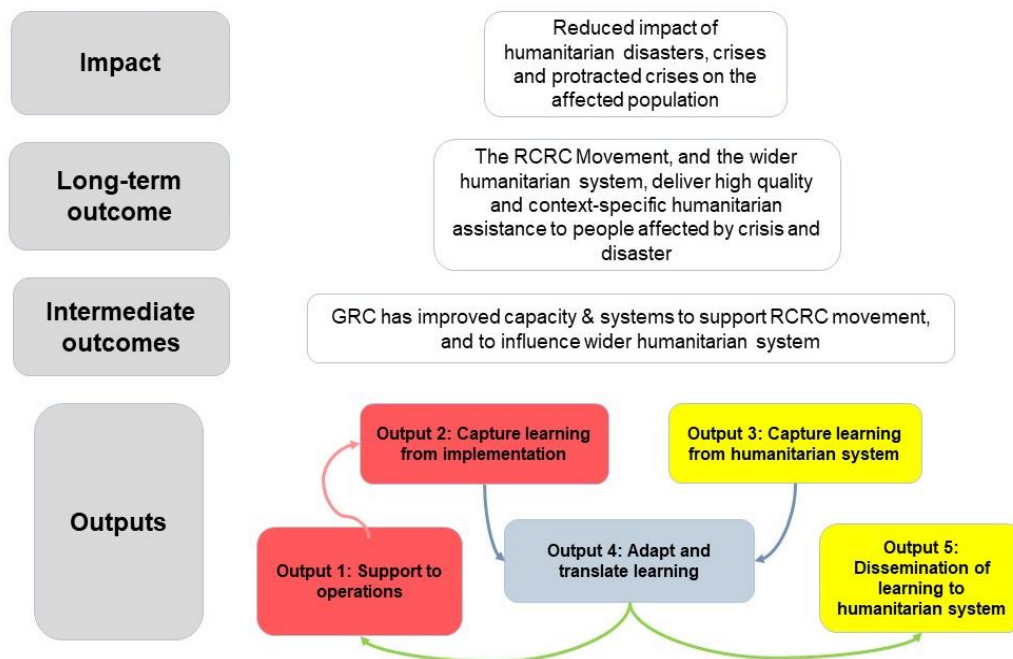

### Methodological Development

Based on captured learnings from implementation and the wider humanitarian system, thematic methodologies and innovative approaches are (further) developed and disseminated back to the wider humanitarian system and the supported projects.

### Policy/Advocacy

GP II seeks to inform, strengthen, and contribute to policy and advocacy at the global and the regional level. Through the policy and advocacy work, GP II findings and achievements are disseminated back into the wider humanitarian system

### GP II Intervention Logic

### Steering Mechanism

The steering mechanism between the GRC and FFO serves to determine the sectoral, regional and thematic-strategic priorities of the GP II in accordance with the needs and situation analyses. It consists of an **annual strategic dialogue**, which also serves to steer the cooperation and to exchange on the implementation status of the global project funding. In addition, there is continuous coordination between FFO and GRC on specific context-related, technical and funding-related topics. The GRC has various mechanisms in place to ensure a close coordination between GPI and GP II.
